EDUCATION

Cornell University, B.A. in Computer Science

Aug 2022 - May 2026

Relevant Coursework: Objected-Oriented Prog & Data Structs, Designing Tech for Social Impact, Introduction to Game Development, Computer System Org & Prog, Foundations of AI Reasoning & Decision Making, Communication & Tech, Discrete Structs, Linear Algebra, Music and Digital Gameplay, C++ Programming, Introduction to Computer Graphics, Functional Prog

TECHNICAL SKILLS

Programming Languages: C++, Python, Java, JavaScript, OCaml, C#, NextJS, React, NodeJS

Frameworks & Tools: Git, Unity, Jira, Scrum, Google Cloud Platform, Figma, Webflow, AR/VR

WORK EXPERIENCES

Kenyi Technologies

Newark, NJ

AR/VR Intern | C#, Unity Engine, Networking, AR/VR, Edge Computing, Computer Vision

May 2025 – Aug 2025

- Developed an AR prototype in Unity for the Meta Quest to demonstrate how varying levels of latency impact player experience and interaction responsiveness
- Simulated end-to-end latency under different networking conditions to highlight the performance advantages of edge computing over traditional cloud-based systems
- Prototype will be presented to company stakeholders as a potential customer-facing use case to illustrate the value of low latency edge solutions in immersive applications

Home Depot

Atlanta, GA

Software Engineering Intern | React, Nextjs, Jira, Google Cloud

May 2024 - Aug 2024

- Developed an admin console using Nextjs and React creating an employee portal into corp databases containing data and site metrics.
- Enabled corporate database updates with site information that then propagates to customer facing supporting communications through Home Depot's enterprise cloud platform
- The end to end tested Admin Console tool was deployed companywide
- Leveraged Google Cloud Platform to process and manipulate data

PROJECTS

Gone Astray - 2025's Most Polished Game Award at Cornell | Java, Jira, Git, libGDX, Scrum

Spring 2025

- Led an 8-member team through development and shipment of a 2D puzzle-platformer with a rotating gravity mechanic, managing timelines, task assignments, and cross functional communication
- Designed and implemented core gameplay systems including a 360-degree gravity controller, interactive backgrounds, dynamic minimap, and a multi-screen visual setup
- Composed and integrated original music and sound effects to enhance player immersion
- Received 'Most Polished Game' award from professors and industry professionals

Grub Bug | Unity, C#, Jira, Git, Scrum

Fall 2024 - Spring 2025

- Directed a cross functional team of 22 developers across programming, art, and design disciplines, managing task pipelines, team morale, and project milestones from pre-production to release
- Developed the in-game camera system to support dynamic gameplay
- Led marketing and public showcase efforts, preparing the game for Steam distribution and organizing its exhibit at the Syracuse Maker Faire (1000+ attendees)

LEADERSHIP

Development in Games Association

Cornell University

Vice President

Aug 2023 – Present

- Managed large-scale events such as game jams, workshops, and industry speaker panels, fostering engagement within the game development community

Development in Games Association Studios

Cornell University

Project Manager

Aug 2024 – Present

- Managed summer, winter and semester game development projects, overseeing interdisciplinary teams of artist, programmers, and designers
- Led event logistics for DGA Studios featuring at Pax East ensuring smooth coordination and presentation
